## **Along the Decumano you walk guided by the senses**

*Spicy or floral smells, definite aromas tell about the world. With a particular attention to the environment and to poor Countries*

### **TASTING**

#### **Historical grappa looks at the future**

Artisanal distillation methods and a tradition (Friulian) that has been going on since the late nineteenth century: with these credentials Grappa Nonino is one of the protagonists of the made in Italy “to drink” at Expo 2015.

You can find it at the Supermarket of the Future (in 1973 Nonino invented the first single variety grappa, revolutionizing the market), as well as at Palazzo Italia and in the Coffee clusters.
